Assignment  
10%

## Lesotho hub website

### Submission Information (10%)

- Push your project to an online git repository (like GitHub.com) and submit the link to your repository with live link to google classroom.
- Host your application on free hosts e.g *000webhost*

### Question

It is proposed to develop a **minimum** of five web pages website where farmers in Lesotho can advertise their products. It is requested that the clients can be able to see the products & prices of each business.

### Web Pages

1. **Home** – Should contain the categories of the farmers e.g *grop farmers where I can be able to navigate to all the farmers*
2. **Business page** – display all the products of each business
3. **About us** – the purpose of Lesotho hub
4. **Contact us** – contact info including a form where clients can submit claims
5. **Tips** - business tips for the business

## Requirements

1. HTML5, CSS

## Marking Criteria

Category	Marks
UI Design(consistency, responsiveness, content)	40
Quality code	20
Graphics	20
<b>Total</b>	<b>80</b>

**Note:** You are encouraged to explore additional features and enhancements beyond the specified requirements to demonstrate creativity and proficiency in Web design development. Use media Queries to make your design responsive.
